Annual Report

of

The Public Printer

Fiscal Year 1962

Annual Report

of

The Public Printer

Fiscal Year 1962

LETTER OF TRANSMITTAL

U. S. Government Printing Office Washington 25, D. C. January 8, 1963

To the Congress of the United States:

Pursuant to the provisions of the Act of January 12, 1895 (sec. 19, ch. 23, 28 Stat. 603) I have the honor to submit the Annual Report of the Government Printing Office for the fiscal year ended June 30, 1962.

Respectfully,

JAMES L. HARRISON Public Printer

The President of the Senate, The Speaker of the House of Representatives.

DIVISION OF PERSONNEL

Full-time employees increased from 6,449 at the beginning of the fiscal year to 6,603 on June 30, 1962.

Personnel recruitment was stimulated by newspaper want ads and civil service registers were established for linotype operators, hand compositors, and cylinder pressmen. Bookbinders, monotype-key-board operators, and proofreaders remain in short supply. Examination announcements are pending or have been made for three offset categories duplicating press operator, lithographic pressman, and pressman (large presses) - and printing-plant worker and apprentices in the several crafts. A total of 12,959 employment applications were received by the Government Printing Office Board of U. S. Civil Service Examiners.

Several plans were initiated which provided incentive through promotion opportunities in the production and planning divisions. These plans encompassed trade helpers and assistants as well as planners and estimators.

Employee programs consistently were more successful than in previous years. These included the blood-donor program where almost a thousand pints of blood were received and the two charity campaigns. United Givers Fund achieved 87.3 percent and the National Health Agencies 78 percent.

· Nine hundred fifty-six employees participated in 47 training programs. These ranged in context from budget and accounting fields to Red Cross First Aid. In addition, two semesters on Editorial Planning for Printing Production had 288 enrollees.

Classification surveys for four divisions - Finance and Accounts, Tests and Technical Control, Purchasing, and Maintenance - are prepared or completed. Functional statements and position descriptions in the skilled laborer and operative groups of production divisions are in process.

Treatment and service visits to the Medical Section numbered 22,460. Employee participation in voluntary, cost-free medical services was substantial. X-rays taken totaled 5,023, and 3,666 employees received influenza immunization.

DIVISION OF FINANCE AND ACCOUNTS

The Division of Finance and Accounts is responsible for all fiscal and legal matters. This includes the handling of finances; accounting; bookkeeping; cost recording and accounting; current cost

analyses; maintenance of accounts payable; audit of vouchers for all purchases; preparation of payrolls; computing charges for all printing and binding, blank paper, supplies and services furnished to the varaious departments and agencies of the Federal Government; maintenance of accounts receivable; record keeping and billing for all goods and services furnished by the Office; collecting all moneys due the Office from claims, damages, sales of Government property, and goods and services furnished to the Government; measurement of typesetting machine composition for operator averages and statistics; maintenance of the general files; and the determination and execution of traffic requirements of the Office.

The Division is also responsible for all budget work; studies in connection with rates and the scale of prices for work performed, and the current readjustment of such rates; the compilation of costs of each printing job as the work progresses through the plant; audit of payrolls; administration of the annual and sick leave laws and regulations; accounting for and preparation of reports with reference to retirement, health and life insurance deductions; preparation of financial, cost, and statistical statements and reports for the use of the Government Printing Office in general as well as the Joint Committee on Printing, the Treasury Department, the General Accounting Office, the Civil Service Commission, the Bureau of the Budget, and the Congress; the performance of all functions necessary in connection with the administrative processing of claims for and against the Government Printing Office; and the rendering of decisions and the furnishing of advice with respect to the applicability of the laws.

The Division is under the Supervision of the Comptroller of the Government Printing Office and is organized as follows:

Administrative Section (Office of Comptroller)
Appropriation Accounting and Auditing Section
Payroll and Time Records Section
Electronic Data Processing (and Cost Accounting)
Section
Billing and Collecting Section
Composition Measuring Section
Computing (and General Files) Section
Traffic Section

PURCHASING DIVISION

The dollar value of Purchasing Division procurement activity amounted to \$76,453,403.91, an increase of \$17,511,254.74, or about 29.7 percent over last year. The breakdown is as follows: Commercial Printing, \$42,553,304.31; paper, envelopes, and cartons, \$28,223,646.51; Materials and supplies, \$2,826,213.78; Machinery and equipment, \$1,050,530.94; and other (includes services, transportation, communications, travel, etc.), \$1,799.708.37.

A large part of this upward trend is represented by an increase of about \$12,715,250 in the value of commercial printing, and an increase of about \$5,577,700 in the cost of paper, envelopes, and cartons. Savings were realized over last year in the purchases of machinery and equipment and expenditures for services, transportation, communications, etc.

The primary functions of the Specifications Section are the planning of work and preparation of bid specifications and cost estimates for various printing products to be procured from commercial sources. During Fiscal 1962 this Section processed 18,096 jackets, 3,165 print orders, 11,356 specifications, and prepared 21,800 cost estimates, an average increase of approximately 23 percent in these operations. In addition specifications were written for approximately 210 departmental term contracts and 12 special term contracts including those for tabulating cards and continuous marginally punched forms.

Tonnage of paper purchased increased from 175,675,993 pounds in 1961 to 215,859,045 pounds in 1962, an increase of 40,183,052 pounds.

Paper prices showed a slight decline of about one-half of one percent in the first quarter, but commencing with the second quarter began a steady increase for a cumulative price rise of about 5.7 percent for the entire period covered by this report.

The average paper inventory was 35,120,343 pounds, an increase of approximately 4,909,554 pounds from the average of the previous year. This figure includes about 5,175,317 pounds in the plants of commercial printers, but does not include an average of about 3,878,088 pounds on hand waiting release from the Division of Tests and Technical Control.

The high point of paper inventory was 40,597,480 pounds on June 22, 1962, and the low point was 27,725,630 pounds on August 21, 1961.

During the fiscal year ending June 30, 1962, the workload of the Stores Section showed a continuing and considerable increase in volume. The Section handled 3,935 carloads and approximately 1,500 truckloads of paper weighing approximately 115,748 tons. In addition 176 million envelopes and 3-2/3 million knocked-down boxes or cartons were received. Approximately 72,500 pieces of miscellaneous material were received via parcel post and motor freight. Shipments of printed matter and blank paper to out-of-town destinations reached a new high of 81,316,148 pounds. Shipments of waste paper and metal also showed an increase over the previous year.

The incoming telephone traffic, including local, long distance, information, and miscellaneous, averages 500 calls per hour during the peak periods. There was an increase in out-going local calls over the previous year, consisting of a total of 298,808 message-units at a cost of \$9,350.63. Long distance calls also increased to 8,821 at a cost of \$14,042.95. A total of 15,887 messages were received and transmitted over the Teleprinters at a cost of \$11,626.81, an increase over Fiscal 1961.

- 6 -

MAINTENANCE DIVISION

During the past year, the Paint Section was separated from the Carpenter Section, and a new unit was established in the Electrical Section to clean elevator shafts and penthouses.

The new Carpenter Section repaired or handled over 78,000 skids and pallets, constructed 1,534 shipping cases, and salvaged over 133,000 board feet of lumber. Over \$150,000 worth of machinery and equipment was obtained from the Naval Weapons Plant. In most cases, this equipment was in excellent condition, and it has served to update and supplement the Division machine tools. In keeping with our modernisation program, switchgear was installed to provide eight additional 600 ampere circuit breakers and feeders which accommodated increasing demands for alternating current.

Activities of the Division during the past year included:

Service calls	41,114
Monthly (regular) job orders	1,092
Miscellaneous job orders	670
Printing and binding jackets	493
New machines installed	20
Overhauls of machinery	5
Machines moved	42
Specifications written	84
Drawings and sketches prepared	543

The Office used 10,400,700 cubic feet of gas, 46,060,000 pounds of steam, 210,473,000 gallons of water, and 38,742,300 kilowatt hours of electricity.

DIVISION OF TESTS AND TECHNICAL CONTROL

The Division tested 13,225 samples during the year as follows:

Paper and envelopes	10,067
Metals	1,412
	669
Printing inks	268
Ink-making materials	260
Chemicals	162
Oils and greases	132
Adhesives and adhesive-making materials	29
Bookbinding leathers	23
Miscellaneous	203

There were 304 rejections for noncompliance with specifications. Of these, 249 were of paper, 27 of ink and ink-making materials, 13 of bookbinding cloths, 7 of envelopes, and 8 of miscellaneous materials. Paper rejections amounted to 7,889,666 pounds, representing 3.55 percent of our total procurement. The principal reasons for paper rejections were:

	Number of			
Deficient In	Rejections	Pounda		
Tensile strength	17	2,154,521		
Brightness	31	1,491,877		
Opacity	37	855,885		
Smoothness	27	810,957		
Unsatisfactory General Appearance	19	482,131		
pH value	21	179,981		

Of 176,37h,310 envelopes received during the year, 685,250 were rejected, principally for adhesive quality.

The Division manufactured 239,044 pounds of printing inks, including stamp pad, toning blue, numbering machine, and mimeograph inks; standardized 14,304,012 pounds of type metal; manufactured 1,778 press rollers requiring 12,729 pounds of composition; and produced 135,255 pounds of molded glue; 129,871 pounds of other adhesives; 1,400 gallons of silver nitrate solution and 1,400 gallons of reducer solution for silver spraying operations.

During the 29 month period February 1, 1959 to July 3, 1961, $290\frac{1}{2}$ pounds of dried silver sludge was accumulated from electrotyping operations, and sent to the U. S. Mint for recovery of the silver content.

Innumerable specifications for paper, envelopes, materials, and supplies were prepared or revised to keep them up to date. In addition, the Division conducted tests and experiments on the use of supplies, and cooperated with the various Federal establishments in the testing and developing of processes and materials necessary for their use.

DOCUMENTS DIVISION

During the year the Division received 3,445,456 orders for 54,762,424 publications, amounting to \$10,901,646.26. Earnings for return to the United States Treasury from this record sale were \$5,770,101.03. The appropriation for the performance of all functions of the Division was \$4,724,000. There were also received 1,836,860 letters of inquiry about publications, 3,323 telegrams and approximately 190,000 telephone requests. The Bookstore and its two brapches sold

1,465,404 publications to 105,439 customers, with receipts of \$451,096.15. As of June 30, 1962, there were 25,509 individual titles in the sales stock of the Division. Mailing lists maintained numbered 1,242 and total addresses included were 2,411,000. Printing ordered from the Government Printing Office amounted to \$5,462,342.

Acquisition of 30,000 square feet of additional bulk storage space outside the Office provided some relief in the critical storage situation of the Division.

The Documents Division Library cataloged 56,258 publications and prepared on schedule the Monthly Catalog, Numerical List and Schedule of Volumes, and title pages and tables of contents for the binding of the Serial Set of Congressional documents.

There were 14,995 miscellaneous publications and periodical prints mailed to depository libraries comprising a total of 5,312,314 copies.

The periodic investigation of all depository libraries required by law was carried out by means of a questionnaire completed and returned by the libraries. Three libraries were dropped at their own request.

Total distribution for other Government agencies was 86,539,173 publications of which 15,421,463 were distributed for Members of Congress. There were 703 mailing lists composing 342,795 names being maintained for other agencies at the close of the year.

There were 486 full-time employees of the Division as of June 30, 1962 as well as 321 on the W.A.E. list to be called in for part-time duty as necessitated by the volume of work on hand.

COMPARISON OF ACTIVITIES FISCAL YEARS 1960, 1961, 1962

ACTIVITY	1960	1961	1962
Number of sales orders	2,978,774	3,133,171	3,445,456
Amount of sales	\$8,512,937.87	\$9,359,937.81	\$10,901,646.26
Miscellaneous receipts	\$4,109,562.01	\$5,085,240.1 3	\$5,770,101.03
Number of letters of inquiry	1,668,903	1,718,798	1,836,860
Publications received for Departmental free distribution	95,109,515	84,871,819	88,942,772
Publications distributed free for Government agencies	94,911,857	78,674,235	86,539,173
Number of publications sold	51,406,414	53,334,549	54,762,424
Number of publications distributed to depose itory libraries	5,371,156	5,031,524	5,312,314
Total publications received	172,303,509	169,607,407	180,524,787
Total publications distributed	175,456,662	163,952,315	178,172,344

FIELD SERVICE DIVISION

Operations of the Field Service Division, with offices located in Chicago, Denver, New York, San Francisco, Scattle, and Washington, D. C., reflect a 15.3 percent increase in value of services performed, with cost of operations up lk.1 percent over the previous fiscal year indicating a sizeable increase in work volume with less than a corresponding increase in cost.

During this fiscal year a 7-day conference of Field Service Office Managers was conducted in the GPO Central Office for the purpose of discussing various phases of each office's activity as related to corresponding functions in the Central Office. Included in the conference were meetings with Central Office officials and other personnel, a Safety Seminar conducted by the Department of Labor, a meeting with the Staff of the Joint Committee on Printing, and a visit to the Defense Printing Plant in the Pentagon in order to give the Managers an insight into the operation of other agency plants. The conference provided an opportunity for an exchange of information and ideas which proved very helpful to the Managers as well as Central Office personnel and it is anticipated that more efficiency and better coordination will be achieved as a result of it.

The Chicago Field Service Office, with an average of 96 personnel, billed \$1,352,172.50 to 31 Government departments. The largest user of the services of this office continued to be the Post Office Department. The Denver Field Service Office produced work for 22 departments amounting to \$703,772.50 in billed value of which the Department of the Interior continued to require the majority of its total production. This office experienced the largest increase in volume of business (72 percent over fiscal 1961) of any of our field offices. The average number of personnel in the Denver office increased from 36 during FY 1961 to 49 during FY 1962. Because of the continuing increase in work volume sufficient space for work operations has become a problem. In this connection the General Services Administration is making a study to determine the best means to provide adequate space for our requirements. In Washington, D. C., the Departmental Service Office, utilizing an average of 273 personnel, billed \$2,715,174.85 to 69 local departments, the largest of which were the Departments of the Army, Treasury, and the Air Force. We were hopeful that the relocation of this office would be nearing consummation in this fiscal year but on June 20, 1962, the design of the new building was rejected by the Fine Arts Commission, resulting in the entire project being again set back with no definite location or plan.

The New York Field Service Office, with an average of 22 personnel billed \$339,457.42 to 32 departments, the largest of which was Treasury. Twenty five departments were serviced by the San Francisco Field Service Office with total billings amounting to \$184,901.63. An average of 16 personnel were employed in the San Francisco office during FY 1962 and its largest user was the Department of the Interior. In Seattle, the Air Force continued to be our largest customer. A total of 26 departments accounted for billings in the amount of \$261,377.75 produced by an average of 16 personnel.

In total, \$5,556,856.65 was billed to 72 different Government departments by the Field Service Division during fiscal year 1962.

The following figures show the comparative value of services performed by the several Field Service Division officesduring the past three fiscal years:

Office	F.Y. 1960	F.Y. 1961	F.Y. 1962
Chicago	\$1,136,604.66	\$1,128,488.80	\$1,382,734.31
Denver	399,895.18	497,351.24	634,103.41
Departmental Service Office (Wash., D.C.)	2,323,005.72	2,384,486.75	2,712,800.79
New York	289,768.40	280,167.35	342,073.18
San Francisco	204,201.47	197,910.33	218,336.49
Seattle	319,445.70	337,971.66	275,377.21
Total	\$4,672,921.13	\$4,826,376.13	\$5,565,425.39

PLANNING DIVISIONS

Division of Planning Service

During this fiscal year, 109,112 orders were received compared to 99,340 received during fiscal year 1961, or an increase of 9.8 percent and the greatest number of orders received during any one of the past 10 years.

Twenty-six percent fewer waivers were issued this fiscal year than last year, in keeping with the policy of the Office. It naturally added to the workload of this Division and particularly to that of the Division of Purchases because nearly all of these additional jobs were of a specialized nature which could not be produced in the Office because of lack of suitable equipment. In this connection twelve waivers were granted for coldtype composition and nine for sequential card composition and related camera and negative services.

Work Processed

	1958	1959	1960	1961	1962
Orders processed	92,671	99,293	100,162	99,340	109,112
Jackets issued	50,900	53,225	55,205	52,476	54,223
Open jackets issued	2,477	2,479	3,400	3,470	3,311
Schedules established	54,664	58,116	53,239	52,349	41,877
Informal estimates	202	200	162	159	146
Spoilages processed	254	196	1,90	503	851
Waivers issued	1,215	1,148	1,248.	1,138	843

Division of Plant Planning

A breakdown of the volume of work processed by Plant Planning during the fiscal year is as follows:

Approximately 16,08h jackets were fully production-planned with approximately 7,765 of these jackets being handled twice in that they were so planned only in part when originally processed, as proofs were requested, and completed when proofs were returned. The number of formal estimates prepared on departmental orders totaled 27,670. Also prepared were 2,192 informal estimates for Congress, Superintendent of Documents and the various other departments; 201 estimates for the Spoilage Committee; and estimates of copy sufficient to make 1,243 pages in the Congressional Record appendix. The line count performed on 1,235 volumes of U. S. Senate Hearings, the cost of which operation is recovered through direct charges to Congress, amounted to 1,352,875 lines or 94,115 25-line pages counted. As required by law, sales prices were developed on 8,379 new and reprint publications offered for sale by Superintendent of Documents.

The number of work jackets prepared for printing and binding requisitions and print orders totaled 38,771. Approximately 8,203 of these jackets were handled at least twice in that they were prepared only in part when originally processed, as proofs were requested, and completed when proofs were returned. Also prepared were 892 "open" jackets. Complete schedules were developed and indicated on approximately 26,710 jackets. Approximately 7,765 of these jackets called for proofs and therefore required two or more schedulings, dependent on the number of times proofs were requested. Copies of these jackets and others not scheduled, and other work as hereinbefore described, were made on the Xerox machine, and totaled 272,000 copies.

Delivery schedules were approved and assigned on 3,675 purchase requests for 215,859,015 pounds of paper in flat sheets and rolls; 12,992,159 sheets and pieces of miscellaneous items; 177,328,826 envelopes; and 3,778,832 cartons of various kinds and sizes. These requests were for purchases on the regular quarterly contracts and the open market. In addition a total of 760 requests were initiated by Plant Planning for special purchase of 32,529,520 pounds of paper in flat sheets and rolls; 1,990,896 envelopes; 555,932 cartons; and 1,861,295 sheets and pieces of miscellaneous items. The number of stores items prepared for commercial programs and jackets totaled 3,295. Commercial specifications totaling 2,620 required the typing of 6,091 requisitions for paper, etc. Field Service requisitions processed for paper, etc., totaled 2,453. A total of 16,120 jackets for blank paper and miscellaneous supplies were prepared in accordance with department requisitions and purchase orders.

PRODUCTION DIVISIONS

Congressional Printing

The congressional workload increased considerably in this fiscal year and in several categories records and near-records were established. Many nights the Record, bills, hearings, caleandars, reports, committee prints, private-speech orders, journals, and various other jobs required by Capitol Hill, most often on an overnight basis, taxed our facilities to the utmost. There have been very few slow periods as the first session of the 87th Congress did not adjourn until September 26, 1961. The final issue of the Record was printed on October 17, and the first copy for the Budget started early in November.

The Congressional Record is our largest, most difficult, and most important responsibility. For the fiscal year just closed, the Record totaled 30,396 pages and averaged 171.7 pages per issue for 177 issues. This is a considerable increase over the previous year when the total was 22,208 pages in 140 issues, and the average was 158.6 pages per issue. Nineteen of these issues were 256 or more pages, and the largest Record, which is the largest in the memory of present personnel, was 448 pages and was printed in two parts for the night of September 26, 1961. The smallest Record of the year was 40 pages and consisted of two issues combined, those for April 23 and April 24.

Bill work shows a reduction in number of prints from 18,215 last year to 14,558 this year. The size of the average print increased, however, because press forms increased from 10,670 to 11,256. We are continuing to use offset facilities where possible to reduce composition; there were only 61,278 pages of Bills set this year as compared with 63,553 the previous year. In the Bill category one outstanding achievement was H.R. 10931, a Bill to codify and revise the laws of the Canal Zone, which made 955 pages and was set in 10-point instead of the usual 14-point to reduce the size. The report which accompanied it, House Report No. 1509, made 800 pages, and both jobs were handled on the same night.

An indication of the increase in volume of other congressional work can be obtained by comparing the galleys read by the Proof Section in various other categories. This year 241,108 galleys of hearings were read, compared with 167,089 galleys read in the previous year. Reports and documents required the reading of 40,062 galleys this year compared with 29,834 last year. There were 106,953 pages of calendars revised compared with 67,701 revised in fiscal 1961.

The Budget

The Budget itself, this fiscal year, was made into a compact volume of 368 pages, while the Appendix to the Budget expanded from the moderate 204 pages of fiscal 1961 to a large volume of 1,172 pages for fiscal 1962. The edge index on the compact Budget made production by the offset process necessary, while the Appendix printed letterpress. Using both letterpress and offset to meet the close delivery date resulted in a better balanced workload. The Composing Division processed 11,046 folios of copy this year compared with 9,004 in fiscal 1961; these made up into 1,707 pages as compared with 1,409 pages for last fiscal year. In addition to the material sent to press, 113 large tables were produced on an overnight basis and rehandled many times, serving as worksheets for the Bureau of the Budget. There were 18 separate items requested for the Budget Message, Special Analyses, and the Budget in Brief.

BINDING DIVISION

Binding Division production remained at a high level throughout the past fiscal year. Pamphlet and Book Edition Sections were particularly hardpressed to fulfill their commitments. The volume of folding, gathering, and inserting in the Pamphlet Section increased greatly. Signatures sewed on the Smythe machines showed a 12-percent increase, while a 39-percent increase in the number of books cased, and a 38-percent increase in the number of cases made caused the Book Edition Section's workload to be consistently heavy.

Bindery-personnel turnover amounted to approximately 18 percent. This figure is somewhat higher than that of fiscal year 1961. Total division manning was up 24 employees as of July 1, 1962.

The Income Tax Program continues to be the largest single program processed by the Bindery. Over one-half billion forms of various formats, and varying from 4 to 64 pages, were produced and delivered during the year. The annual publication of the Agriculture Yearbook was particularly noteworthy this year, consisting of 704 pages and printing 277,621 copies. The covers were preprinted in blue ink by offset and cases made on sheetfed casemakers. Congressional Record and Federal Register editions are produced each night for morning delivery. Total pages of these publications increased from 13,000 to 30,396 and total copies from 6,415,500 to 8,660,000 for this fiscal year.

The workload from the Library of Congress dropped sharply and, as this represented a large segment of the Library Bindery Section operations, some shifting of work from other sections was necessary to

maintain a stable workload.

A number of new and modern machines were purchased and installed in the Bindery over the period covered by this report, all of which contributed to the effective processing of work in this Division.

COMPOSING DIVISION

The Composing Division experienced an unusually high requirement for composition during the past fiscal year, a requirement that exceeded the capacity of the Division to provide the composition volume and to meet scheduling demands within regular working hours. In order to furnish composition in the amounts demanded and within times specified, it was necessary to resort to many hours of overtime. However, during the fiscal year 1962, one hundred seventy-six million two hundred sixty-five thousand three hundred more ems of measurable type matter were set than in 1961. Gross ems of type matter produced in the past two years are shown below:

Furthermore, in an effort to meet the increased demands of the Congress, as well as the Departments, 90,581 folios of manuscript were converted to composition by commercial contractors outside of the plant. Analyzing output by sections shows that all units rose with the exception of Monotype Keyboard. This Section's production was off more than 36 million ems, due entirely to the serious shortage of monotype keyboard operators, who were virtually unobtainable from the Civil Service Register.

As of June 30, 1962, division-manning strength shows a drop from 1,575 to 1,553, or 22 employees fewer than on June 30, 1961. Procurement of qualified compositors has not kept pace with division needs. Projecting this problem into the future seems to emphasize the need for more vigorous recruitment and an expanded apprentice program to meet our requirements.

The Dated Periodical program showed a slight decline in the number of items handled, but the TAGO program required the processing of 345 more prints this year than last-6,988 in 1961, up to 7,333 for this year.

LETTERPRESS DIVISION

Letterpress production remained fairly level during the year,

with a slight increase shown in chargeable hours of about 2.8 percent. Fewer forms were sent to press, but an increase of 2,041,428 impressions over the same period indicates a trend toward somewhat longer runs. Shipment of postal cards dropped from 1,702,815,000 to 1,569,082,000, but this was due to Departmental action anticipating postal-card rate changes by the Congress. Production was stopped on April 13, 1962. However, when appropriate legislation failed to materialize, production of the three-cent postal card was resumed on May 21, 1962.

Personnel-turnover rate continues to impose a serious burden on Division effectiveness. During this fiscal year 23 percent of our skilled craftsmen were lost through retirement, death, resignation, and transfer. Frequent detailing of pressmen from this Division to the Offset Division further complicated this problem. Recruiting has not kept pace with these losses, and replacement training is time-consuming and costly.

Five new Miller presses were installed during the year. Recommendations for two new high-speed envelope presses and an automatic die-stamping press have been favorably considered by the Modernization Committee. This will permit the Division to handle increased demands for work of this type and eliminate premium hours to meet schedules.

OFFSET DIVISION

The Offset Division has shown significant gains in all production areas over the past fiscal year without a corresponding increase in personnel strength. Division manning shows an over-all rise of approximately 5 percent. The following production figures may be used to compare this increase with that of Division output. The Offset Preparation Section processed 2,277 additional jackets—an increase of approximately 12 percent. The Offset Plate Storage Unit issued 4,255 additional jobs (37 percent more than in fiscal 1961) while at the same time receiving 2,248 more jobs from commercial contractors for storage. The Offset Press Section printed 27,992,444 more impressions during the year, or an increase of about 9 percent. Extensive modernization and streamlining of photographic facilities have effected a remarkable improvement in negative production from 34,345,832 square inches in fiscal 1961 to 48,149,056 square inches in 1962.

Many new techniques and processes were examined during the year, and Division technology and efficiency continued to improve. The acquisition of a modern, fully automatic, step-and-repeat machine controlled by pre-punched, plastic tapes has materially improved plate-making and has virtually eliminated plate remakes and lost press time due to mis-register on multicast work. Widespread use of various new types of offset plates, espeially the bi-metal, negative-working Lithengrave plate, has improved plate life tremendously. This type of

plate produced over one million impressions on tax-form work during the year. As the demand upon this Division increases, an alreadyserious space shortage is becoming more critical and will require solution within the next fiscal year.

PLATEMAKING DIVISION

Total square-inch production for this Division shows a sizable increase over the past year. This increase, however, was due entirely to a marked rise in the production of stereotype plates. Stereotype production was up more than 7,000,000 square inches, an increase of better than 40 percent. Demand for all other Division products was off somewhat from the previous year, but a compensating drop in employee strength was experienced, balancing out this shallow dip in Division production. Photoengraving showed the most significant decline, primarily due to failure of overflow negative demand from the Offset Division to materialize in anticipated quantities. Electrotype production shows a reduction of approximately 8 percent but, significantly, this drop is almost exactly equal to the percentage loss in personnel, serving to point out that normal attrition is taking care of this reduced demand. In spite of this disappointing report, it is felt that with the introduction of the wraparound process of letterpress printing, and the newly-acquired four-color-process capability of the Photoengraving Section, a more satisfactory production picture is in the immediate future.

LIBRARY BRANCH OFFICE

The Library of Congress Branch work continued at a steady pace with very little change in pattern. Total number of catalog cards printed dipped from 44,738,397 in 1961 to 40,379,978 in fiscal 1962. This was due to a reduction in the number of copies ordered. However, the number of forms printed showed an increase of over four percent, the number of titles received rose by nearly six percent, and the titles set by more than four percent.

A major improvement was proposed in the reproduction of catalog cards, following a survey by the Public Printer of all phases of this service to the Library. This proposal took the form of a recommendation by the Public Printer's Study Committee that the Ektalith Process be adopted as the most practical method of reproduction for catalog cards. The Librarian of Congress accepted this suggestion, and this process is being installed, with full production promised in fiscal 1963.

DELIVERY SECTION

As might be expected from the growth in over-all Office business, the Delivery Section experienced a sizable increase in its operations. Recorded partial and complete shipments for the fiscal year were 177,604—an increase of 35,987 shipments. Fleet mileage of 291,428 miles rose by 32,829 miles. Accident-frequency rate was not as low as in 1961, when the fleet won second place in Nationwide competition in its class, but was still good enough to place us fifth in competition with 93 other fleets in the Nation.

The appearance of our fleet was improved greatly through the body-repair and painting program instituted by the Public Printer.

APPENDIX (Statistical)

STATUS OF APPROPRIATIONS SALARIES AND EXPENSES OFFICE OF SUPERINTENDENT OF DOCUMENTS FISCAL YEAR ENDED JUNE 30, 1962

Salaries and expenses, Office of Superintendent of Documents.

The status of the appropriations for the Office of the Superintendent of Documents is summarized as follows:
